

SOFTTHRIVE

Website Improvement Brief for Developer

10 Improvements	3 Critical Fixes	1 New Page Build	KSA Target Market
---------------------------------------	--	--	---

Website: softthrive.netlify.app | Final Domain: softthrive.com | Purpose: Meta Ad Campaign Support
May 2026

1. Background and Context

Softhrive is launching Meta ad campaigns targeting Saudi Arabia and Qatar for Shopify store development and mobile app development services. The ads use Meta Instant Lead Forms so visitors do not land on the website directly from ads. However Saudi clients will Google Softhrive after seeing the ad to verify credibility before filling the form or after filling it. The website must instantly confirm that Softhrive is the right agency for their needs.

Primary Website Purpose for This Campaign

Saudi client sees Arabic Shopify ad → fills Meta lead form → Googles Softhrive to verify credibility → visits website → must immediately see: professional agency, Saudi market experience, real portfolio, clear pricing, easy WhatsApp contact.

2. Priority Overview — All Changes

Priority	Change	Page	Impact
P1	Add floating WhatsApp button — visible on every page	All pages	Critical
P1	Fix all stats — remove contradictions	Homepage + Footer	Critical
P1	Rebuild Shopify service page completely	/services/shopify	Critical
P2	Change homepage hero headline	Homepage	High
P2	Update footer — remove Montana US	All pages	High
P2	Add Shopify Arabic portfolio to homepage	Homepage	High
P2	Strengthen all CTAs — add urgency language	All pages	High
P3	Add Arabic language toggle	All pages	Medium
P3	Add Saudi client testimonials	Homepage + Shopify page	Medium
P3	Add FAQ section	/services/shopify	Medium

3. Fix 1 — Floating WhatsApp Button [CRITICAL]

Why: Saudi clients use WhatsApp for all business communication. They will not fill a contact form. A floating WhatsApp button means they can contact Softhrive with one tap from any page.

Exact Implementation

- Position: Fixed — bottom right corner — z-index above everything
- Size: 60px x 60px circle — large enough to tap easily on mobile
- Color: WhatsApp green — #25D366
- Icon: WhatsApp logo SVG — white on green background
- Visible on: Every single page — homepage, service pages, portfolio, contact
- Mobile behavior: Always visible — never hidden on mobile

WhatsApp Link Format

```
https://wa.me/[YOUR_WHATSAPP_NUMBER]?text=Hi%20Softhrive%20%E2%80%94%20I%20saw%20your%20ad%20and%20I%20am%20interested%20in%20a%20Shopify%20store
```

Pre-filled Message

The WhatsApp link should pre-fill this message so Softhrive knows the lead came from the campaign:

```
Hi Softhrive – I saw your ad and I am interested in a Shopify store
```

Add your actual WhatsApp business number to the link before going live.

4. Fix 2 — Fix All Stats and Numbers [CRITICAL]

Why: The website currently shows contradicting numbers. Footer says 38+ live products. Hero says 100+ mobile apps. Meta ads say 150+ apps. Saudi clients who cross-check will notice immediately and trust drops.

Current vs Correct Numbers

Location	Current Text	Change To	Action
Hero section	100+ Mobile apps	150+ Mobile apps	UPDATE
Hero section	300+ Web apps	300+ Web apps	KEEP
Hero section	100+ Live Shopify stores	100+ Live Shopify stores	KEEP
Footer	38+ live products	REMOVE ENTIRELY	DELETE
Footer	Upwork Top Rated	Upwork Top Rated	KEEP
All pages	No team size mentioned	Add: 40 person team	ADD

Rule: Every number on the website must match the Meta ads exactly. Ads say 150+ apps — website must say 150+ apps. No exceptions.

5. Fix 3 — Rebuild Shopify Service Page [CRITICAL]

Why: Current Shopify page has only one case study and a contact form. A Saudi client who clicks through to verify Softhrive's Shopify work sees almost nothing. This page must be fully rebuilt to convert Saudi visitors.

Page URL

softthrive.com/services/shopify/

Complete Page Structure — Section by Section

Section 1 — Hero

Element	Content	Notes
Headline	Professional Shopify Stores for Saudi Businesses — Ready in 7 Days	Large H1 — first thing visible
Sub headline	We have built 100+ stores for Saudi businesses. Yours can be live in 7 days or your money back.	Below headline — smaller text
CTA Button 1	Get Free Consultation on WhatsApp	Primary CTA — green WhatsApp button — links to WhatsApp
CTA Button 2	View Our Shopify Portfolio	Secondary CTA — scrolls to portfolio section
Stats bar below hero	100+ Saudi Stores 7 Day Delivery 40 Person Team Top Rated	4 stats in a row — clean icons

Section 2 — Portfolio

Element	Content	Notes
Headline	Real Stores We Have Built	Simple and direct
Store cards	Show 4–6 real Softhrive built Shopify stores	Mobile screenshots — Arabic stores preferred
Each card shows	Store screenshot + category + short description	Hide client domain and logo if needed
Store categories	Fashion, Food, Beauty, Electronics, General retail	Show variety — proves range
Note	All stores shown must be Arabic language — mobile view	Saudi clients must relate to these stores

Section 3 — Pricing

Package	Price	Pages	Delivery	Includes
Basic	\$499	5 pages	7 days	Home, Products, About, Contact, Policy
Standard	\$999	8 pages	14 days	Basic + Blog, FAQ, Collections, Arabic
Premium	\$1,999	10+ pages	21 days	Standard + SEO, Speed optimization, Custom features

Display pricing as three clean cards — highlight Standard as Most Popular. Add note: Starting from \$499 — no hidden fees.

Section 4 — Guarantee

Element	Content
Headline	Our Promise to You
Promise 1	Your store ready in 7 days — or we keep working until it is
Promise 2	Not satisfied? Full refund — no questions asked
Promise 3	Dedicated project manager from day one
Promise 4	Free revisions during the build process
Visual	Green shield checkmark icons next to each promise

Section 5 — Testimonials

Element	Content	Notes
Headline	What Our Saudi Clients Say	
Testimonial 1	Show client name, business type, star rating, review text	Real client — Saudi or GCC preferred
Testimonial 2	Show client name, business type, star rating, review text	Real client — Saudi or GCC preferred
Testimonial 3	Show client name, business type, star rating, review text	Real client — Saudi or GCC preferred
Source	Link to Upwork or Fiverr review if possible	Third party validation is stronger

Section 6 — How It Works

Step	Title	Description
1	Free Consultation	Tell us about your business and what you need. We respond within 30 minutes on WhatsApp.
2	Design and Build	Our team designs and builds your store. You approve every step before we move forward.

Step	Title	Description
3	Launch in 7 Days	Your store goes live. We train you on how to use it and stay available for support.

Section 7 — FAQ

Question	Answer
Do you build Arabic Shopify stores?	Yes — all our stores include full Arabic language support, right-to-left layout, and Saudi Riyal pricing.
How long does it take?	Basic stores are ready in 7 days. Standard in 14 days. Premium in 21 days. We guarantee these timelines.
What if I am not satisfied?	We offer a full refund if you are not satisfied with the delivered store. No questions asked.
Do you accept payment in Saudi Riyal?	Yes — we accept bank transfers in SAR, USD, and other major currencies.
Can I add products myself after launch?	Yes — we train you on how to manage your store and add products independently.
Do you provide support after launch?	Yes — we provide 30 days of free support after your store goes live.

Section 8 — Final CTA

Element	Content
Headline	Ready to Launch Your Shopify Store?
Sub text	Join 100+ Saudi businesses who chose Softhrive. Your store can be live in 7 days.
CTA Button	Start on WhatsApp — Free Consultation — large green button
Urgency line	Limited spots available this month

6. Fix 4 — Homepage Hero Headline [HIGH]

Why: Current headline We make it happen is too generic. A Saudi client who lands on the homepage needs to instantly understand that Softhrive builds apps and Shopify stores for businesses like theirs.

Current vs New

Element	Current	Change To
Main headline	We make it happen	We Build Apps and Shopify Stores That Grow Your Business
Sub headline	Mobile apps, SaaS, Shopify, and AI — one team from idea to launch	150+ apps delivered. 100+ Shopify stores live. Your project is next.
CTA Button 1	Book a free call	Get Free Consultation on WhatsApp
CTA Button 2	View work	See Our Portfolio

7. Fix 5 — Footer Updates [HIGH]

Why: Footer currently says 38+ live products which contradicts everything else. Also says Montana US which may confuse Saudi clients about where the company is based.

Element	Current	Change To	Action
Product count	38+ live products	REMOVE ENTIRELY	DELETE
Location	Montana, United States	Global remote — Serving Saudi Arabia and GCC	UPDATE
Time zone	US Mountain MST/MDT	REMOVE	DELETE
Tagline below logo	Bright product design. Serious engineering.	150+ Apps. 100+ Shopify Stores. One Team.	UPDATE
WhatsApp in social links	Small icon — hard to find	Add separate large WhatsApp CTA button above footer	ADD

8. Fix 6 — Add Shopify Portfolio to Homepage [HIGH]

Why: Current homepage portfolio only shows Frenzone Live — a social streaming app. Saudi Shopify clients cannot relate to this. The homepage needs to show Shopify stores prominently.

What to Add

- Add a dedicated Shopify section on homepage — below the services section
- Show 3 of your best Arabic Shopify stores as mobile screenshots
- Each store card: screenshot + store category + one line description
- Section headline: 100+ Live Shopify Stores We Have Built
- Button below: View All Shopify Work — links to /services/shopify
- All stores shown must be Arabic language mobile view
- Hide client domain names and logos if needed

9. Fix 7 — Update All CTA Language [HIGH]

Why: Current CTAs like Begin onboarding and Book a free call are too soft and corporate for Saudi audience. Saudi clients respond to direct and urgent language.

Current CTA	Replace With	Where
Book a free call	Get Free Consultation on WhatsApp	Homepage hero
Begin onboarding	Start Your Project Today	Homepage CTA section
Talk to the team	Message Us on WhatsApp Now	Homepage CTA section
Start this service	Get Free Consultation on WhatsApp	Shopify service page
Contact form	WhatsApp button — primary contact method	All service pages
See proof	View Our Shopify Portfolio	Shopify service page

10. Fix 8 — Arabic Language Toggle [MEDIUM]

Why: Meta ads are in Arabic. Saudi clients who land on the website expect at minimum an Arabic option. This significantly increases trust and reduces bounce rate.

Implementation Options — Choose One

Option	Effort	Recommendation
Full Arabic translation of entire website	High — 2–3 weeks	Best option if time allows
Arabic toggle for homepage and Shopify page only	Medium — 3–5 days	Good middle ground
Arabic language on Shopify service page only	Low — 1–2 days	Minimum viable option

Arabic RTL Requirements

- All Arabic text must use RTL direction — `dir=rtl` attribute
- Font: Cairo or Tajawal — Google Fonts — both free and work well for Arabic web
- Arabic Shopify page URL: softthrive.com/ar/shopify — separate Arabic version
- When Arabic is active flip layout to right-to-left

11. Fix 9 — Saudi Client Testimonials [MEDIUM]

Why: Saudi buyers heavily rely on social proof and peer reviews before making any purchasing decision. Real testimonials from Saudi or GCC clients dramatically increase conversion.

Where to Add

- Homepage — below the portfolio section — 3 testimonials
- Shopify service page — dedicated testimonials section — 3 testimonials

Each Testimonial Card Should Show

- Client first name and last initial — e.g. Ahmed K.
- Business type — e.g. Fashion store owner, Saudi Arabia
- Star rating — 5 stars
- Review text — 2–3 sentences — specific about results
- Source badge — Upwork or Fiverr logo if review is from there

Example Testimonial Format

Ahmed K. — Fashion Store Owner, Riyadh ★★★★★

Softhrive delivered my store in 5 days. Professional, responsive, and exactly what I needed. Sales started coming in the same week it launched. Highly recommended for any Saudi business.

12. Fix 10 — FAQ Section on Shopify Page [MEDIUM]

Why: Saudi clients have specific questions about Arabic support, payment methods, and delivery timelines. Answering these on the page removes friction and reduces the need for a consultation call just to get basic info.

See Section 5 Fix 3 above — FAQ questions and answers are already written there. Use those exactly as provided. Implement as an accordion style expand/collapse component for clean mobile display.

13. Implementation Order for Developer

Complete in this exact order to maximize impact fastest:

Order	Task	Estimated Time	Priority
1	Add floating WhatsApp button — all pages	2–3 hours	CRITICAL
2	Fix all stats — update numbers — remove 38+ from footer	1–2 hours	CRITICAL
3	Update footer — remove Montana US — update tagline	1 hour	HIGH
4	Update homepage hero headline and CTAs	2–3 hours	HIGH
5	Rebuild Shopify service page — full new structure	2–3 days	CRITICAL
6	Add Shopify portfolio section to homepage	1 day	HIGH
7	Add testimonials — homepage and Shopify page	3–4 hours	MEDIUM
8	Add FAQ section to Shopify page	2–3 hours	MEDIUM
9	Update all CTA language across all pages	2–3 hours	HIGH
10	Add Arabic language toggle — Shopify page minimum	3–5 days	MEDIUM

Steps 1 to 4 can be completed in one day and should be done immediately.

Step 5 — rebuilding the Shopify service page — is the most important task and should start immediately after steps 1 to 4 are complete.

14. Design Guidelines for All New Elements

Element	Guideline
Brand colors	Keep existing Softhrive color palette — do not introduce new colors
WhatsApp button color	#25D366 — official WhatsApp green — always
Arabic font	Cairo or Tajawal from Google Fonts — both support Arabic perfectly
Mobile first	All new sections must look perfect on mobile — Saudi audience is 99% mobile
Loading speed	Optimize all new images — use WebP format — Saudi mobile connections vary
CTA buttons	Large enough to tap on mobile — minimum 44px height — clear contrast
Portfolio images	Mobile screenshots of stores — 390px width mockup — iPhone frame optional
Pricing cards	3 column layout desktop — stack to 1 column on mobile
FAQ	Accordion style — collapsed by default — smooth expand animation
Testimonials	Card style with border — star rating in yellow — source badge bottom right

15. What NOT to Change

These elements are working well and should remain untouched:

- Overall website design aesthetic — clean and professional — keep as is
- Navigation structure — works well — do not restructure
- Upwork and Fiverr badges — keep prominent on homepage
- Integration logos section — impressive tech stack — keep
- How we deliver section — mobile, web, Shopify tabs — keep
- Frenzone Live case study — keep as is — shows app development capability
- Color scheme and typography — keep existing brand identity
- Footer service links and company links — keep structure

Goal of These Changes

When a Saudi client Googles Softhrive after seeing the ad they must land on a website that immediately confirms:

This agency builds Shopify stores for Saudi businesses.

They have real proof. They are professional. I can contact them right now on WhatsApp.

That confirmation converts a curious visitor into a paying client.
